THE BADGE

Paste one line. It updates every day.

```
<a href="https://lakelevelnow.com/lake/lake-mead/">
<img src="https://lakelevelnow.com/embed/lake-mead.svg" width="360" height="96" alt="Lake Mead level"></a>
```

- A static image, with no scripts and no cookies.
- 43 lakes. Pick a lake at lakelevelnow.com/embed.

FOR STORIES

Ask me for a number. I answer within a day.

• Long-record charts for Lake Mead, Lake Powell and 12 California lakes, some with 85 years of data. Use them with a credit line.

• When a lake sets a new low or high, I can send the reading, the date and the source within a day.

• Readers already look for this. Weekly users grew from 243 to 748 in four weeks (GA4).

• Every reading comes from USBR, USGS, CDEC, TWDB or USACE, and the page names its source.

Tell me which lake you cover.

I send you the badge line for it and a link to its long-record chart. If you want a version in your colors, I make it free.
